

Corporate Overview

Established in: 2007

Team size: 30

Who are we?

We are a Pune based Indian software Development Company with the primary focus on Web Development. We help clients move their services and products up the value chain and create a unique experience for their customers.

Our experience:

Company has total 16+ years of collective experience in developing software for US, UK, Canadian, French, Japanese and Indian clients. Some of the best minds and talent are a part of our team.

Why Regulus?

- Innovation
- Simplicity
- Quality
- Well-trained & Qualified Professionals
- Intellectual Property Protection
- Timely delivery

Domain Expertise

- Banking/Financial
 - Education
 - Health Care
 - Hospitality
- Human Resource
- Manufacturing/ Industrial
 - Networking
- Information Technology
 - Recruitment
 - Fundraising
- Supply Chain Management

Technical Expertise

- **Languages** - C#.Net, VB VB.Net, ASP, ASP.Net, ASP.Net MVC, F#, PHP
- **Web Technology** – HTML 5, CSS3, DHTML, Java Script, JQuery, Ajax, Office 365, JQuery, Silverlight, JSON, Magento (open source CMS)
- **XML** - XML, XSL, XSLT, XSD
- **SharePoint** - Windows SharePoint Services 3.0 (WSS), Microsoft Office SharePoint Server (MOSS)
- **Servers** - Microsoft IIS Server, MOSS Server, VM Server 2012 XAMPP, Microsoft Azure, Amazon
- **Database / Storage** - Azure AD, Azure SQL DB, Microsoft SQL Server 2005/2008 R2/2017/2014, MySQL, MS Access, SQLite
- **Framework** - Net Core 2.1.1, .Net 4.0/4.5 framework, Windows Presentation Foundation (WPF), Windows Communication Foundation (WCF), Windows Workflow Foundation (WWF), Share point services Framework, Entity Framework, NHibernate, Framework7
- **Web Service** - SOAP / REST
- **Tools** - Microsoft Visual Studio 2017/2013/2010, SSMS 2017/2014 .NET Core MVC Razor UI, Visual Studio 2010/2012, Visual Interdev, Visual Studio 6, ReSharper, StyleCop, Ardoq 1.59.0, Netbeans, Workbench, Jing

Technical Expertise

- **Reporting** - Crystal Report
- **Version Control** - Source Control In Github, Visual Source Safe (VSS), Team Foundation Server (TFS), SVN.
- **Microsoft Patterns** - .Net Core MVC 2.1.1, Prism 4, Model View Component (MVC), Model View View Model (MVVM), XAML
- **Mobile Development** - JQuery Mobile Framework, Highchart, PhoneGap Build, Phonegap – Cordova, XCode
- **Testing** –
 - Automated - Quick Test Professional, Selenium
 - Manual - TestRail, TestLink, BugZilla, Issuetracker, Jira, TargetProcess, Postman, Advance Rest Client
- **Project Management** – Confluence, Snow, Jira, TargetProcess, Axosoft
- **Other** - Kendo/Telerik UI For .Net Core, OnTime, Devforce Ideablade framework, DevExpress windows controls, SignalR, Component Art, Kendo UI, eWorld controls, Twitter Bootstrap, TDD, Image Crop, CK Editor, Bee Editor, Froala Editor, HelpIQ and Powtoons, Manatee Works Barcode Scanner, AutoMapper

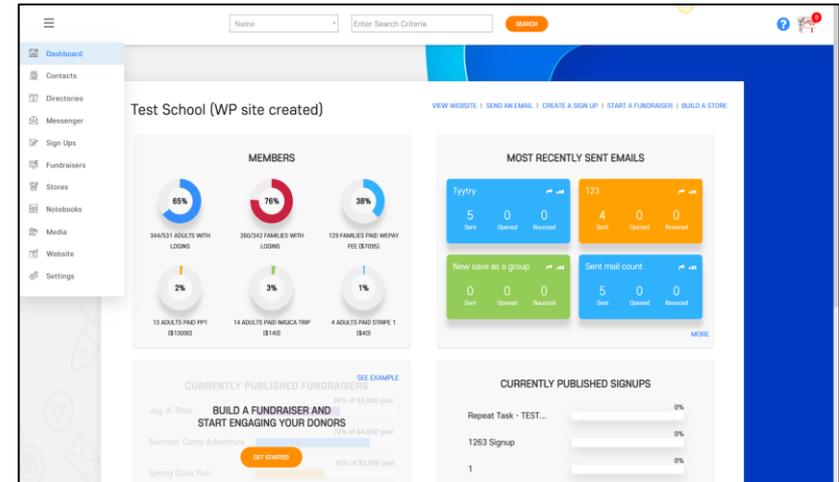

MJS PTO

MJS PTO is website which manages the Parent Teacher association of the school. This PTO system provides the various entity relations across the school system. The entities available inside the MJS PTO system are linked with each other.

This includes the different modules like Contacts, Directories, Messenger, Sign Ups, Fundraisers, Stores, Notebooks, Media, Website, and Settings.

Dashboard provides the graphical statistics view to the users.

The Contacts page shows a sidebar with a 'GROUPS' list and a main table of contacts. The table has columns for First Name, Last Name, Email, Date Registered, and Type.

GROUPS	FIRST NAME	LAST NAME	EMAIL	DATE REGISTERED	TYPE
Classrooms	22	22		Not Registered	Student
1st Group	4	4	regulusmell@gmail.com	Not Registered	Student
Abcd group	A	A	abcd@gmail.com	Not Registered	Student
Aleka Group	Rahul	Asses'ia	monaighumalkar@gmail.com	Not Registered	Parent
Board12	Ab	Ab		Not Registered	Student
Board2	Umesh	Adam	Umesh@gmail.com, umesh_chenab@gmail.com	08/01/2019	Parent
CC Fee Only (Fee)	Rahul	Agnhotri	rpahulgagnhotri@gmail.com	09/19/2019	Parent
Fam1111 (Fee)	Hello	Appa	AppaRahul@gmail.com	09/30/2019	Parent
Family fee (Fee)	Rs	Rs		Not Registered	Student
Harish test (Fee)					

Services

Waste Management System

Waste Management System is a systematic waste collection application designed for a large scale US based company. The application consists of number of modules mainly subscription creation, work order creation, invoice generation and printing for the specified billing period. It also facilities to update the service address from the MapInfo. The application allows payment for the invoices generated. Also, online payments are acceptable. It also generates reports for drivers for each route and the service address subscribed on it. A user friendly UI allows user to navigate from each form smoothly. Nightly routines clear the unwanted data and manipulate the necessary records depending upon the dates entered.

The 'Create Subscription' interface features search fields for service address and customer information. It includes a table for existing subscriptions and a 'Service Subscriptions' table with columns for SID, Status, Start Date, End Date, Temp or Perm, and Subscription Type. The 'Service Subscriptions' table contains the following data:

SID	Status	Start Date	End Date	Temp or Perm	Subscription Type
10982	Inactive	10/31/2011	11/07/2011	Temp	Pomona Commercial Bin - Temp

Buttons at the bottom include 'Expand All', 'Collapse All', 'Select Services', 'Create Route Request', and 'Add Non-Routed Address'. There are also checkboxes for 'Use address verification service', 'Use MapInfo service', and 'Conversion Mode'.

The 'Create Work Order' interface displays service address details, customer information, and work order configuration. It includes a table for service addresses and a 'Customer' section with fields for company name, address, and contact details. The 'Service Notes' section is currently set to 'Rate Policies'. The 'Work Order' section includes fields for Work Order Number, Customer ID, Creation Date, Service Date, Recurrence Period, and Next Service Date. The 'Requesting Location' and 'Servicing Location' are both set to 'Pomona'. The 'Reason' is 'Customer' and 'Payment Terms' are '15 Days'. A button for 'Arrange Payment' is located at the bottom right.

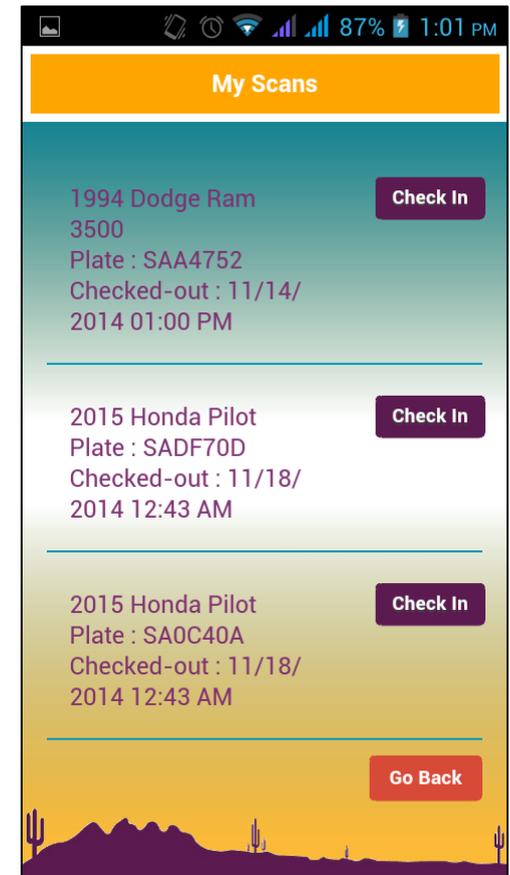

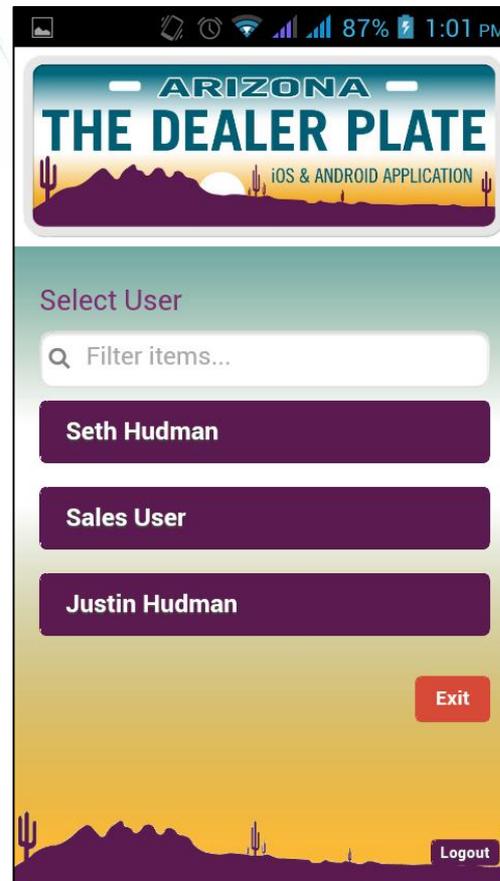

Dealer Plate App, AZ

The Dealer Plate app is the easiest way to manage state mandated dealer plate audit logs. App quickly scan vehicle identification number (VIN) barcodes and automatically capture driver information to fill out the audit log.

The Dealer Plate application is an indispensable tool for accurately capturing all dealer plate activity to remain compliant.

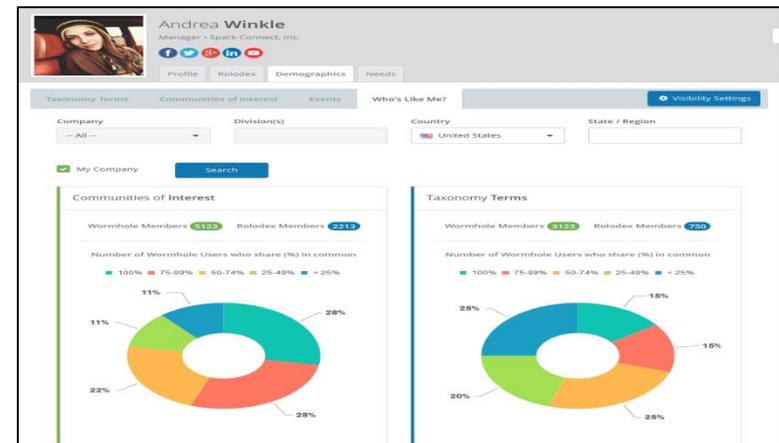

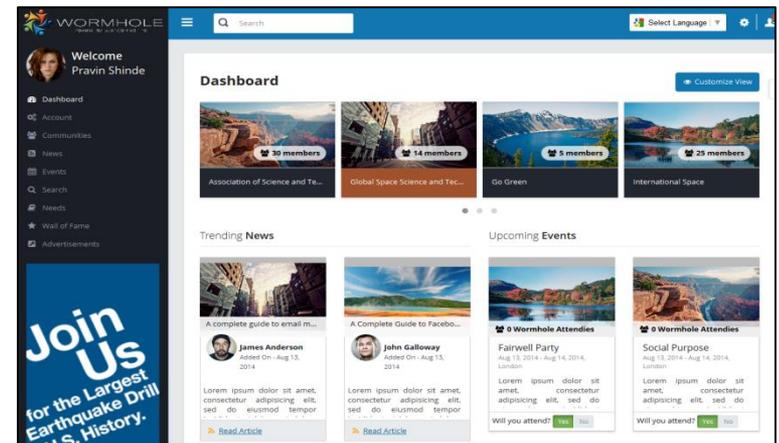

This app is having great user friendly UI.

Wormhole

Wormhole is a community system for the companies those work in the space field. Here multiple communities are formed with different areas of expertise and social media integrations. Company can participate in the different communities and will have opportunity to expose their services and products. Participants can request for news, events, and advertisements. Upon approval and online payments, exposed to the communities. Suggestions are accepted from user and are implemented. Rolodex is social connection media on Wormhole. Demographics provides summary and status for the user (and outsiders) to view roll-up numbers regarding user's connections in different aspects.

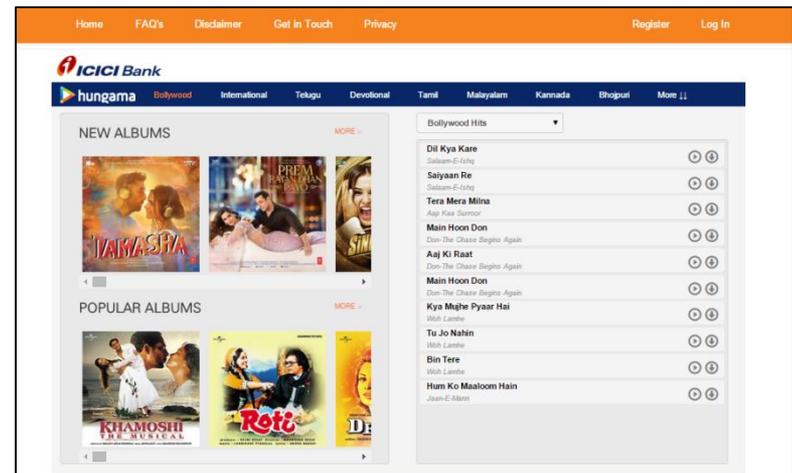

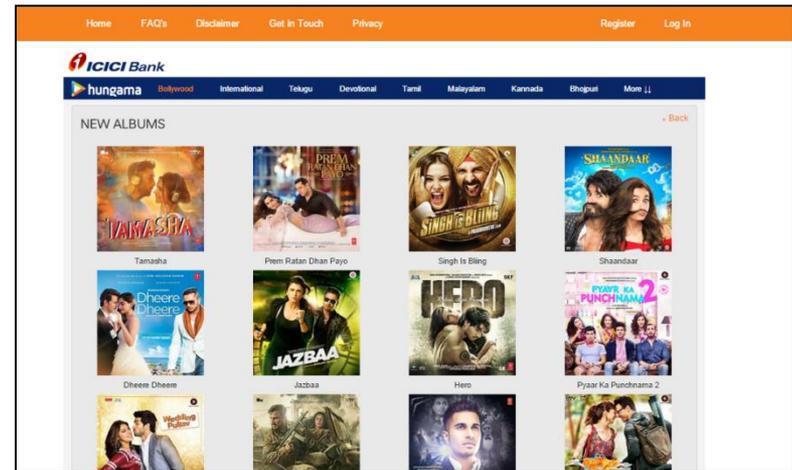

ICICI – Hungama Portal

ICICI - Hungama portal is developed for listing and selling the music files through ICICI bank.

The portal interacts with Hungama.com APIs to list the Albums from various categories on the portal. User can select multiple songs from these albums and purchase those.

The payment gateway used here is of ICICI Net banking and once paid user gets a original MP3 file of the selected songs.

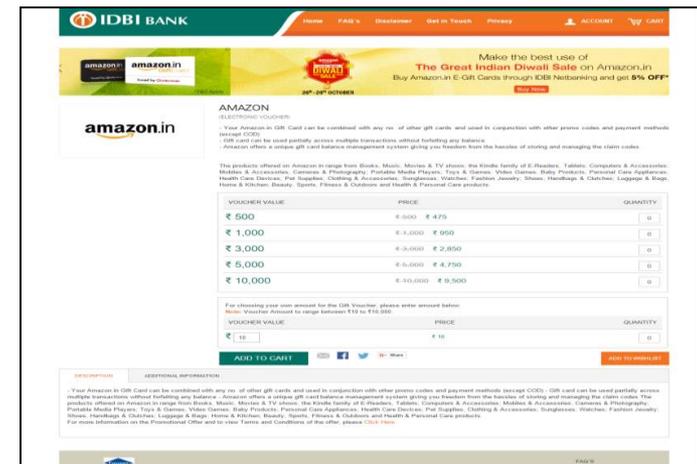

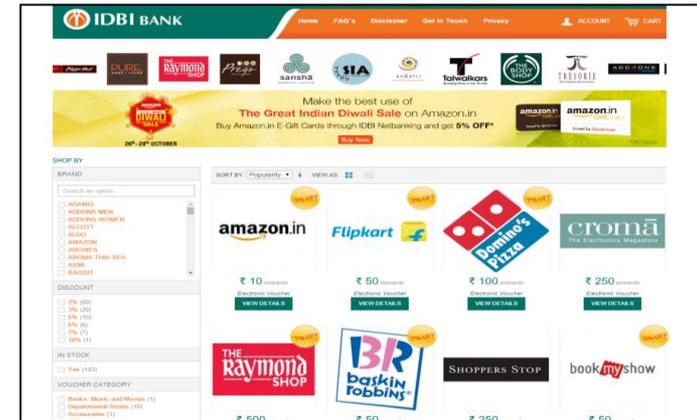

IDBI Gift Shop Portal

IDBI Gift shop portal is developed for IDBI bank.

It is listing of gift vouchers of various brands on the portal where user can purchase these gift vouchers and send them electronic vouchers to the desired person as a gift.

The payment gateway used here is of IDBI net banking and once the payment is successful, user receives the vouchers over email and on mobile phone in the form of SMS.

Smart City – Aurangabad, Hyderabad

The ambitious Smart Cities project of the Government of India envisions 100 sustainable, eco-friendly, technologically-advanced urban settlements that would provide citizens with a high standard of living, better governance, quality infrastructure, and uninterrupted utility and social services.

Information and communication technology, intelligent transport systems, centralized service controls, optimized energy management and effective emergency systems are some of the smart solutions that would be implemented in these cities. The application helps citizens to submit their ideas and suggestions for make the city 'SMART'.

AURANGABAD Live Smart Participate News and Updates

The Tourism Capital of Maharashtra seeks citizen cooperation to become a Smart City

The ambitious Smart Cities project of the Government of India envisions 100 sustainable, eco-friendly, technologically-advanced urban settlements that would provide citizens with a high standard of living, better governance, quality infrastructure, and uninterrupted utility and social services.

Information and communication technology, intelligent transport systems, centralised service controls, optimised energy management and effective emergency systems are some of the smart solutions that would be implemented in these cities.

Aurangabad is a worthy contender in the India Smart Cities Challenge - a social competition that will determine the cities that will be selected for development under the Smart Cities project. The contest invites local

- Imagine**
Based on your suggestions, we will create a common goal and vision for Aurangabad.
- Identify**
We will collate all your responses and compile a list of the main areas of improvement that will be focused on in the third phase.
- Ideate**
The areas of improvement identified in the second phase will be examined and addressed through innovative and effective ideas and solutions suggested by citizens and group entities.

AURANGABAD Live Smart Participate News and Updates

- Safety and Security
- Transport and Connectivity
- Education and Healthcare
- Ecology and Sustainability
- Employment, Business and Economy
- Finance and Banking
- Communication and Social Networks
- Recreation, Sports and Entertainment
- Culture and Heritage
- Tourism

Established in 1610 and named after the Mughal emperor Aurangzeb, the historical city of Aurangabad houses the Ajanta Caves and Ellora Caves (UNESCO World Heritage Sites) and the famous Dakhani Taj (Bibi Ka Maqbara), among many other tourist attractions. An ancient trade centre, now an emerging IT and manufacturing hub, this metro is an ideal candidate for the Smart Cities project. If selected, Aurangabad will receive substantial government funding in terms of finance and resources to realise some of the best and most effective ideas and solutions proposed by citizens and group entities. This would lead to a more modern and comfortable life in a better, safer, greener home for the city's residents.

PacketTrap Network Management System

Development: Network management solutions provide the unique benefit and capability of power, ease of use and reliability, quick deployment, and are scalable to the most robust heterogeneous networks. The applications can generate alerts in case of un-expected behavior of the device. Patches can be applied to the monitored devices automatically on the scheduled intervals.

Testing: Suites/Scenarios & Status Tracking - Test Link & Test Rail, Various Documentation - MS office We have accomplished Test Planning, Test Case, Scenarios & User Guides writing. Carried out the competitor study to design and analysis for developing new features. We also have done automation by developing VB scripts to perform the smoke test of certain areas.

JNPT

JNPT is a parking management system designed for Jawaharlal Nehru Port in Navi Mumbai. It collects the details of the truck that utilizes the parking and generates check-in and check-out ticket for each. The system provides a professional way of managing all of the collected details of each vehicle and generating parking ticket for it. It brings up the transparency of the transactions of parking charge collection & settlements between operators-supervisors and supervisors-client. It provides a real-time access of parking related data to the managers and custom officers at JNPT. The tickets generated are compatible for printing on the thermal printers. The daily transactions export is available for analysis. The system is very fast, flexible and user-friendly.

<http://www.RITeSchool.com>

Developed mainly to share the burden of teachers and to give comfort to parents of school going kids. We understand that teacher's time is precious and they should concentrate only on sharing knowledge to students and not in clerical work.

The screenshot shows the RITeSchool web interface. The top part displays a 'Fee Details' table with columns for Fee Type, Payable For, Amount, Due Date, Paid Date, Amt. Paid, Amt. Payable, Late Fee, Edit, Delete, and Print. Below the table, there is a 'Student Details' section for a student named Ananya Sachin Sangarwal, including their date of birth, class, roll number, and mobile number. Other sections include 'Upcoming Events', 'Unread Messages', and 'Photo Albums'.

The screenshot shows the RITeSchool mobile app interface displaying a 'Progress Report' for a student. It features a bar chart showing scores in various subjects: English (18), Hindi (22), Mathematics (20), Science (20), History & Civics (18), Geography (18), and Computer (15). The overall score is 140 out of 200, with a percentage of 70%.

The screenshot shows the RITeSchool mobile app interface displaying a 'Fee Details' page. It lists various fee types such as 'Library & Laboratory Fees', 'Transport Fees', and 'School Fees' with their respective amounts and due dates. There is also a 'Pay Online' section at the bottom.

The screenshot shows the RITeSchool mobile app interface displaying a dashboard with various service icons. The icons include Attendance, Progress Report, Fees, Timetable, Subject Teachers, Homework, Exam Schedules, Notices, Message Center, SMS Center, Annual Planner, School Notices, Parent Teacher Association, Photo Gallery, and Change Password.
